SURF PARK SUMMIT EUROPE

OCTOBER 24TH & 25TH, 2017

Hosted at Surf Snowdonia in the Conwy Valley, North Wales, U.K.

Surf Park Summit Europe will be held at the world's first successful commercial surf park – [Surf Snowdonia](#), located in the pristine foothills of the Snowdonia National Park in North Wales.

Dozens of surf parks are now in the development pipeline across a number of countries, sectors and competing wave generation technologies. The time to deep dive into the best and latest information and network with leaders in the industry is now. Attendance is strictly limited to 75 carefully curated stakeholders in the rapidly growing surf park space.

Surf Park Summit Europe will provide a unique behind the scenes experience and allow you to discuss all aspects of Surf Snowdonia with the ownership group and team who conceived of, designed, funded, built and now operate it at a level of [visitation double that predicted in pre-development feasibility reporting](#). You will also have the opportunity to explore operations with the Surf Snowdonia ownership & management team and understand the full range of customer experiences from beginner to advanced surfers.

A series of speakers will give a full account of the wave technology and surf park marketplace. Wave technology and man-made surf destination companies will be represented alongside industry suppliers and experts in the field. Updates on the latest industry developments and research will be shared.

There will be plenty of opportunities to network with those at the forefront of the surf park industry while immersing yourself in the world's first commercially successful man-made surf destination experience and enjoying the flavor sensations of local agricultural produce, beers and wines in the Surf Side Restaurant & Bar.

Accommodation onsite in Surf Snowdonia's glamping pods is included in the ticket price. If you would prefer a more traditional hotel we can assist you in making those arrangements.

Together, we are shaping the future of surfing outside the ocean.

Cheers to making waves,
John Luff & Dr. Jess Ponting
