

Webinar: Onychomycosis Treatment with Non-Thermal Lasers

Presented by Kerry Zang, DPM, DABPS, FACFAS

Dr. Kerry Zang is an innovator in podiatric medicine. He is a distinguished physician at the forefront of regenerative medicine & laser therapy. With a history of being sought out by his peers for his expertise, Dr. Zang's is unequivocally a physician resource. Dr. Zang's regenerative medicine passion will be unleashed as he discusses onychomycosis conditions and effective laser solutions he has implemented in practice & now teaches other podiatrists around the globe. Attendees will leave this webinar with a clear understanding of regenerative medicine & low-level laser therapy's substantiated role.

A 60-minute webinar that will focus on Onychomycosis treatment with non-thermal lasers and provide an opportunity to put your clinical questions to Dr Kerry Zang.

Objectives

- Understand the role regenerative laser medicine has in podiatry.
- Recognize the latest advancements in regenerative therapy.
- Physiology of photobiology of low-level laser therapy (LLLT).
- Recognize regenerative medicine's primary & adjunctive therapies.
- Understand the role of dual wavelength LLLT in the treatment of onychomycosis.
- Incorporate new research & its clinical applications in the treatment of onychomycosis.

When: Tuesday, August 17th, 2021

Time: 10:00 AM AEST (Sydney Time)
